

Mini-Course on Generative AI Applications

Ali Zarifhonarvar

Indiana University

Oct 28 - Nov 4 - Nov 11, 2024

Session 3

- ▶ Example of Writing
- ▶ Example of Research Assistance
- ▶ Custom GPTs
- ▶ Example of Automation
- ▶ Example of Coding
- ▶ Local Deployment

Nov 11

Extension Tools 3,000,000 users

The screenshot displays the Google Scholar Button extension interface. It features a search bar at the top with the text "Search extensions and themes". Below the search bar, there are tabs for "Discover", "Extensions", and "Themes", with "Extensions" currently selected. The main content area shows the "Google Scholar Button" extension, which is a tool for finding academic papers. It includes a search bar, a list of references, and a "Remove from Chrome" button. The references list includes papers by Berger, A. (1999), Godbole, S., Sarawagi, S., & Chakrabarti, S. (2002), Heckerman, D. (1995), Joachims, T. (1998), and Jones, K. S. (1972). The interface also shows a "Publisher" section with a search bar and a list of articles, including "The Histone Variant H2A.W Defines Heterochromatin and Promotes Chromatin Condensation in Arabidopsis".

Some useful tools(3)

► Beyond Chat

Beyond Chat: AI Agent Demo
Created by AI Digest

Buy a coffee maker

GPT-4o ▾

Buy a gift for someone who loves reading

Purchase what Jake needs for his internship (see email)

Respond to all starred emails

Purchase required furnishings for the villa (see email)

☐ See what the agent sees

● Ready to start task

What is this? ▴

This is a demo of an AI agent that can follow instructions and perform actions on websites.

It's designed to help you understand what agents are, their capabilities and limitations, and what the implications might be.

As far as we know, this is the first in-browser demo of a web-navigating agent that you can interact with.
